PROFESSIONAL SUMMARY

AI/ML-focused Computer Science undergraduate with proven experience building end-to-end ML pipelines on real-world datasets. Delivered a KNN-based property price predictor trained on 10,000+ scraped listings, an IoT health-risk classifier integrating live sensor data, and a multi-feature Islamic mobile app with 100+ active users. Seeking a summer 2026 AI/ML internship to apply skills in model development, feature engineering, and deployment.

TECHNICAL SKILLS

Core ML/AI: Python, Scikit-learn, TensorFlow, CNN, ANN, KNN, K-Means, Feature Engineering, Data Pipelines

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Plotly, NetworkX

Web & Mobile: React Native, MERN Stack (MongoDB, Express, React, Node.js), Firebase

Databases: MySQL, MongoDB, SQLite, Neo4j, Firebase

Languages: Python, C++, Java, JavaScript, PHP, Shell Scripting

Tools: Git, GitHub, Kaggle

PROJECTS

Smart Air Quality & Health Risk Prediction System | IoT + ML | 2026

- Built real-time air quality monitor using PMS5003 sensor, processing particulate matter readings at <2s latency
- Trained classification model achieving 91% accuracy across 4 health risk levels on 5,000+ sensor readings
- Integrated live sensor pipeline with ML inference for instant risk alerts; deployed on Raspberry Pi
- Tech: Python, Scikit-learn, PMS5003, Pandas, Matplotlib

SmartEstate Property Price Predictor | ML + Web Scraping | 2025

- Scraped and cleaned 10,000+ property listings from Zameen.com using BeautifulSoup and custom parsers
- Engineered 15+ features (location encoding, area normalization, property type) improving model RMSE by 23%
- Benchmarked KNN, Linear Regression, and Random Forest; selected KNN with $R^2 = 0.84$ after cross-validation
- Tech: Python, Scikit-learn, Pandas, BeautifulSoup, Matplotlib

Qiblo — Islamic Mobile App | React Native + Firebase | 2025–2026

- Developed and deployed 4-feature app (Qibla direction, prayer times, Quran reader, Duas) with 100+ active users
- Integrated Firebase Realtime Database for user state and prayer data sync across devices
- Reduced initial load time by 40% through lazy-loading and component memoization
- Tech: React Native, JavaScript, Firebase, REST APIs

EDUCATION

BS Computer Science — AI Specialisation | FAST National University (NUCES) | Aug 2023 – May 2027 |

- Relevant coursework: Machine Learning, Deep Learning, Data Structures & Algorithms, Database Systems, Computer Vision
- Active in AI/ML competitions on Kaggle; applied hyperparameter tuning and ensemble methods on real datasets

LEADERSHIP & EXPERIENCE

Director of Social Media & Marketing | Zindigi Prize | 2024–2025

- Led full digital marketing strategy across 3 platforms, growing engagement by 35% over 6 months
- Awarded for outstanding contribution by programme leadership at year-end

Event Lead | Student Tour (450+ participants) | 2025

- Managed end-to-end logistics, vendor coordination, and safety protocols for the largest student event of the year

Event Lead | Student Expedition (120 participants) | 2024

- Coordinated 8-person planning team; delivered event on schedule with zero safety incidents

ACHIEVEMENTS & ACTIVITIES

- Zindigi Prize Award — recognised for outstanding performance and contribution (2024–2025)
- Kaggle ML competition participant — applied preprocessing, feature selection, and model tuning on public datasets
- Measurably improved model performance across multiple projects through systematic feature engineering and validation
